240SL

The power to clear the way in ROW sites

Using Method for flexible control

- + Start with a strong herbicide foundation for broadleaf and brush control, and add mix partners to create a custom solution to meet your specific needs
- + May be used for Individual Plant Treatments in all rights-of-way VM sites transecting grazed areas*
- + Use Method in combination with Esplanade for the complete bare ground solution
- + Reliable in all vegetation control settings
- + Do not use within the root zone of desirable trees or vegetation; this root zone can be extended well beyond the tree canopy

*See approved label for VM use sites

Method controls key problem weeds including:

- > Agapanthus
- > Bell Vine
- > Fleabane
- > Saffron Thistle
- > St Johnswort
- > Spotted Spurge

Method controls key problem brush & woody weeds including:

- > Acacia
- > African boxthorn
- > Blackberry
- > Broom
- > Eucalyptus
- > Gorse
- > Mesquite
- > Radiata Pine

Spray programs are not all created equally – as every climate, operation and region faces unique challenges.

With Method, a new herbicide for broadleaf and brush control, vegetation managers now have the power of this latest chemistry to meet the needs of their operation. This helps simplify their operation and save time and money.
