

Long-term residual control for industrial vegetation management

Esplanade® pre-emergent herbicide Spring offer:

Purchase 3 x 1L bottles of Esplanade and receive a 4th bottle FREE!

Promotion valid from 1st September – 31st October or while stocks last, exclusively available through Envu accredited Agents.

Connect with your preferred Agent to order today, or contact the Envu team on 03 7019 3839.

Esplanade advances weed control in industrial vegetation environments. This superior, broad-spectrum pre-emergent herbicide is unlike anything else on the market. Its unique mode of action helps manage herbicide resistance in key weeds while delivering effective, long-lasting control.

- Long-term residual control even under the most difficult conditions on over 30 weed species, including Annual ryegrass & Veldt grass – [refer to the Esplanade label for a full list of weeds controlled](#)
- Less post-emergent herbicide applications result in reduced labour and fuel costs
- Applied at a low use rate of 150mL/ha and formulated as a 500 g/L suspension concentrate (SC)
- Convenient and easy-to-use packaging
- Odourless and nonstaining to surfaces
- Minimal PPE requirement as compared to traditional vegetation management herbicides

Active ingredient
Indaziflam 500g/L

Mode of action
Inhibition of cellulose biosynthesis inhibitor (CBI)

Group
29

Formulation
Suspension

Packaging
1 L Bottle

T&C: Envu standard terms and conditions apply.
