Connect with your preferred Agent to secure stock for your broadleaf, brush, and woody weeds program today, or contact the Envu team on 03 7019 3839.

Method 240SL is a breakthrough post-emergent herbicide, powered by aminocyclopyrachlor (ACP), a new active ingredient for the Australian landscape. Delivering proven, long-lasting control of Lantana, Mesquite, Prickly Acacia, Sticky Nightshade, and other invasive woody weeds, including many classified as noxious or invasive.

Designed for use in pastoral, conservation, and grazing land, Method 240SL empowers graziers, spray contractors, Natural Resource Managers, and conservation groups to reclaim rangelands, improve productivity, and secure long-term environmental and economic sustainability.

**T&C:** Envu standard terms and conditions apply. Offer available until May 31, 2025. Purchase must be made in one transaction.

\*Multi-tool will be sent to Agent store for distribution to applicable customers at end of promotional period.

\*Free of Charge product will be provided at time of sale via Agent & adjusted and reported within AIMS system.
