HomeGuard range and Kordon Warranty

To whom it may Concern,

Following the acquisition of FMC GSS specialty solutions business in May 2025, we're pleased to announce that the HomeGuard support products can now be used to assist the Kordon Termite Management system. The main advantage is you can now use multiple products on the same site and have one manufacturer warranty to support your installation.

Key uses include, but are not limited to:

- Use of HomeGuard Flexi collars
- Protectacote to construction joints, retaining walls, doorway rebates and slab edge
- Termiflex to sheeting damage/ joints, cold joints and conduits.
- HomeGuard GT can be used to fill/ protect joints.

Installations must be carried out as per the current Installation manual. As part of the warranty Terms and Conditions the installer must be accredited in both systems.

The certificate of installation must cover where each product has been used as part of the warranty terms and conditions, we also recommend recording Batch numbers incase an issue arises in the future.

If you have any questions or concerns, please contact our Sales team who can assist.
