News Release

Envu Completes Transfer of Global Specialty Solutions Assets in Australia, New Zealand, and Japan, Expanding Environmental Science Portfolio

Melbourne, Australia, 6 May, 2025 – Envu, a global leader in environmental science solutions, today announced the successful transition of FMC Global Specialty Solutions (GSS) assets into its Australia, New Zealand, and Japan operations, representing a significant step for its growth in the APAC region and a notable expansion of its offerings for customers. The move follows the close of the Envu acquisition of GSS from FMC Corporation (NYSE:FMC) for $350 million which was announced in November 2024.

The GSS portfolio includes a diverse range of products that serve multiple markets, including golf courses, professional sports stadiums and pest control. The acquisition strengthens the Envu portfolio offering and capabilities while providing new pathways to innovation for customers in professional pest management, turf and ornamentals, and more through the combined strengths of the organisations.

As part of the acquisition close last year, Envu and FMC agreed to a delayed asset transfer in some countries – including Australia, New Zealand, and Japan - to allow for the completion of certain operating processes to ensure business continuity for customers. Those processes were finalised for all three countries on May 1.

“We are thrilled to formally welcome Global Specialty Solutions into Envu operations in Australia, New Zealand and Japan, marking an exciting new chapter for our business and customers in APAC,” said Nadim Mohr, Head of Commercial Operations for APAC. “With the asset transfer now complete in these countries, we are able to directly offer customers a broader range of integrated solutions tailored to their needs and backed by Envu’s deep expertise and commitment to environmental science.”

“The official transition of Global Specialty Solutions assets in these key countries is an important milestone in this acquisition,” said Gilles Galliou, Envu CEO. “As a leader focused solely on the environmental science space, we are well-positioned to drive new innovation and can now move forward with maximising our collective potential in these countries and beyond.”

Envu is committed to a continued partnership with FMC to ensure a smooth transition for customers and ongoing access to innovation.

About Envu

Envu was founded in 2022, a new company built on years of experience, for the sole purpose of advancing healthy environments for everyone, everywhere. Envu ANZ offers dedicated services in: Professional Pest Management, Golf, Ornamentals, Industrial Vegetation Management, Lawn & Landscape and Range & Pasture. Across each of its lines of business, Envu focuses its work on chemistry and beyond, collaborating with customers to come up with innovative solutions that will work today and well into the future. Globally, the Envu portfolio consists of over 180 trusted and well-known brands. The company employs nearly 900 people and operates in more than 100 countries with four global innovation hubs.
