

A discreet and effective way to control house flies

Best uses

Maxforce® Fly Spot Bait provides a discreet and effective way to control house flies in and on the outside surfaces of commercial and residential structures including non-food/non-feed areas of commercial food handling establishments, restaurants, dining areas, storage facilities, schools, hospitals, nursing homes, offices and buildings at marinas. Maxforce Fly Spot Bait may also be applied to the exterior and interior surfaces of dumpsters and other waste containers.

Key strengths

Powerful attractants combined with the active ingredient imidacloprid. This product provides immediate results with a long residual.

Benefits of Maxforce Fly Spot Bait

- Easy application
- Immediate results
- Long residual (up to 4 weeks when applied indoors)
- Treat less surface area
- Sprayable formulation
- Low odour
- Controls pyrethroid-resistant flies

How to apply Maxforce Fly Spot

Dilute Maxforce Fly Spot by mixing 125 g per L of water (1.25%). This is accomplished by adding 2.2 packages per L of water (or 1 package per 450 mL of water).

Rate of application

Low to moderate infestations: apply two litres of finished spray to treat 100 m² of fly resting surfaces.

Moderate to high infestations: apply four litres of finished spray to treat 100 m² of fly resting surfaces.

Where to apply

Spray diluted Maxforce Fly Spot Bait on fly resting areas such as on walls, around windows and the exterior and interior surfaces of dumpsters or trash collection bins. Apply product in spots of no greater than 0.2 m² in locations where house flies tend to rest. Spots are not to be adjoining. The combined area of spots is not to exceed 10% of the total surface area of a room.

50 x 56.7 g packages

Food/feed handling establishments

Applications in food/feed handling establishments are permitted **ONLY** in non-food/non-feed areas. Non-food/non-feed areas include garbage rooms, lavatories, entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, mop closets and storage (after packaging, canning or bottling).

Why use Maxforce Fly Spot Bait

- Maxforce Fly Spot Bait provides fast and effective results, while eliminating the need to treat large surfaces
- Maxforce Fly Spot Bait fits well into an overall integrated pest management program for house flies that includes proper sanitation and environmental controls, such as exclusion and proper light management

Additional application information

- Apply with low pressure sprayer, do not exceed 20 PSI
- Reapply if house flies continue to be a problem, but not before 7 days
- Treat as a wettable powder and agitate diluted material frequently throughout the day
- Applications of this product may leave a visible residue or discolour some surfaces. Before treating, it is advisable to test application in a small inconspicuous area
- Avoid keeping diluted material in sprayer for more than a couple of days. If storing diluted product in the sprayer, ensure that you properly label and store this material in accordance with provincial and federal pesticide regulations

Restrictions

- Do not exceed more than 500 g of product per 100 m²
- Treated bait spots must be placed in locations **NOT** accessible to children, pets, livestock or wildlife
- Do not apply in food areas of food processing or manufacturing facilities or in agriculture facilities
- Do not apply in classrooms or patient rooms
- Do not allow people or pets to re-enter treated areas until sprays have dried
- Do not apply to overhead areas or in confined spaces without appropriate respiratory and eye protection
- Ventilate treated areas after application either by opening windows and doors or through use of air exchange/ventilation systems confirmed to be operational. Use fans where required to aid in the circulation of air
