Combat stored grain pests effectively with K-Obiol

Active Ingredient:

Deltamethrin 2.5% WP

Recommendations for use:

K-Obiol is useful against stored grain / seed pests like weevils, beetles, moths, etc. that infest rice and wheat grains. It is a new generation synthetic pyrethroid useful for long duration effective control of adult mosquitoes under public health programs.

Key features and benefits:

Good chemical stability

Odourless and stainless

Knockdown and residual effect

Treatment of stacks & application to gunny bags

Mode of Action:

K-Obiol is a non-systemic insecticide which acts on insect by contact and ingestion. In both cases lipophilic nature promotes its action. In the insect body, it affects the nerve transmission by acting on axon. It has knockdown effect.

Dosage:

For surface treatment of grains and seeds in stacks as well as ceilings and floors in warehouse, mix 120 g of K-Obiol thoroughly in 3 litres of water and spray it to cover 100 sq. mt. area.

For residual treatment against mosquitoes, dilute 25-50 gm of K-Obiol in 1.5 to 2.5 litres of water and spray or atomizers on walls, ceilings, floors and iding places of mosquitoes.

Antidote:

Anti histamines, diazepam and other symptomatic treatment.

Packs:

1 Kg

Always read and follow label instructions.
