

Racumin Sure: Effectively control rats, mice and bandicoots. Be sure of results.

Racumin Sure is recommended for the control of commensal rodents in residential premises, poultry farms and in the fields.

- ✓ Ready to use wax blocks
- ✓ Single dose anti-coagulant
- ✓ No risk of secondary poisoning

Racumin Sure: A single feed, ready to use anti-coagulant rodenticide.

Active Ingredient:

Bromadiolone 0.005%

Recommendations for use:

Racumin Sure is recommended for the control of commensal rats around residential premises, poultry farms and in the fields

Key features and benefits:

Ready to use
wax blocks

Single dose
anti-coagulant

Pre baiting is
not necessary

Effective in
single feed

No risk of
secondary poisoning

Mode of Action:

Bromadiolone is a single dose anticoagulant rodenticide. When consumed by field and commensal rodents, it causes disruption in the normal blood clotting mechanism and thereby an increased tendency to bleed (haemorrhage).

Dosage:

Each 100 g pack contains 6 pieces of wax blocks/ cakes. Depending on the infestation level, place 1 piece of cake per rat or mouse and 2 pieces of cake per Bandicoot.

Cakes can be placed in the burrows and at places frequented by the rodents and one application provides good control.

Repeat the application in case there is re-infestation.

Antidote:

Vitamin K. Administer Orally or intramuscularly.

Packs:

100 gm

Always read and follow label instructions.
