

## An innovative solution to control mosquitoes under public health program

Solfac WP 10 is used as an indoor residual spray for control of mosquito vectors which cause malaria, dengue, filariasis, etc. The formulation is in the form of wettable powder that needs to be mixed with water and sprayed on walls to protect against public health pests like mosquitoes and other household pests like cockroaches and house flies.

- ✓ Fast knock down action
- ✓ Powerful flushing properties with broad spectrum of activity
- ✓ Long lasting residual effect even on alkaline surfaces (up to 3 months)
- ✓ Virtually invisible spray residues on treated surfaces
- ✓ Globally evaluated for Public Health
- ✓ Recommended by NVBDCP-TAC
