Envu Announces Virtual Panel Discussion on Biodiversity

Company welcomes three outside experts to explore ways of mitigating climate change by protecting and restoring native biodiversity

[Cary, North Carolina, April 25, 2023] – Envu, an environmental science company providing forward-thinking innovations that protect and enhance the health of environments around the world, invites the public to join them for a LinkedIn Live panel discussion on biodiversity's critical role in a changing climate and the steps Envu is taking to promote biodiversity.

The virtual discussion is taking place Thursday, May 11 at 11 am EDT. Moderated by Envu CEO Gilles Galliou, the event will feature Envu Head of ESG and New Business Models, Matt Nespeca, and outside experts Matt Germino, Toby Maxwell, and Otavio Campoe discussing sustainable forestry, methods of restoring native rangelands and forests, and the importance of protecting biodiversity in the face of climate change.

"Climate and biodiversity are inextricably intertwined," said Nespeca. "Envu is dedicated to standing at the forefront of climate action by investing in solutions that help promote biodiversity and mitigate the effects of climate change."

Envu, which aims to enable the restoration of over two million acres of native biodiversity by 2030, is working to protect environments and help counter the effects of climate change with products and digital solutions that promote biodiversity. This includes Rejuvra® and RangeView™, which enable the restoration of North American rangelands, and Esplanade® NA, which is helping to restore native forests in Brazil.

These efforts and much more will be explored during the May 11 LinkedIn Live panel discussion, which will be hosted on the Envu corporate LinkedIn page and recorded for those unable to join live.

"This panel will provide unique insight into the world of biodiversity and the fight against climate change through the eyes of our Envu team and leading field researchers," said Nespeca. "We look forward to the discussion and welcome anyone who would like to join us."

About Envu

Envu was founded in 2022, a new company built on years of experience, for the sole purpose of advancing healthy environments for everyone, everywhere. Envu offers dedicated services in: Professional Pest Management, Forestry, Ornamentals, Golf, Industrial Vegetation Management, Lawn & Landscape, Mosquito Management, and Range & Pasture.
