# Maxforce® Ant Solutions

## Stay in control of ants no matter the season

### Maxforce® Complete granular insect bait: Broadest spectrum of control at the bookends of the season

- + Nutrient-balanced, protein-rich granule formulation that ants search for to help the queen with egg production during the cooler parts of the season
- + Controls a wide variety of ant species, plus cockroaches, crickets, silverfish and more

### Maxforce® Quantum ant bait gel: Economical, lasting control of all species

- + Long-lasting liquid gel formulation that is rich in carbohydrates for sweet-feeding ants during summer months
- + Hygroscopic formula retains and absorbs moisture to keep it attractive to ants for up to three months

### Maxforce® Fleet ant bait gel: Powerful action and fast control with surgical placement

- + Formulated with a mixture of carbohydrates and protein for effective control all season long
- + Ants transfer the bait to larvae and the queen to eliminate the colony seven days quicker than any competitor
- + Fipronil delivers broad-spectrum ant control on difficult-to-control species
- + New, thicker formula stays where it's applied

### Maxforce® FC Ant Bait Stations: Effective, child-resistant control for up to one year

A long-lasting solution that controls odorous house ants, pharaoh ants and more. Ants will bring the bait to the nest and eliminate the colony, and the non-repellent formula will not cause secondary colony formation.

### Maxforce® FC Fire Ant Bait: Long-lasting fire ant control with low-dose granules

A low-dose residential and commercial solution with the exclusive Maxforce Domino Effect®, which means the delayed action ensures the bait is spread throughout the colony before it takes effect.
