Solutions Guide

Redefining pest management together

Helping you to deliver pest-free environments for your customers

Envu is committed to helping foster healthier environments where people live, work and play. We're with you at every step, providing deep technical support, education and unparalleled presence in the field. Every day, we're dedicated to serving you by delivering innovations in pest protection and prevention through our products, solutions, digital tools and sales programs.

Bedbugs

Confidently take out bedbugs with blended technologies

Tackle hard-to-manage pests with powerful solutions that work inside and outside

Temprid® FX insecticide keeps bedbugs and other hard-to-eliminate pests at bay with a blended technology that delivers dual action so you can solve the toughest challenges with confidence.

- Active Ingredients**
 - + Imidacloprid
 - + B-cyfluthrin
- Formulation**
 - + Suspension concentrate
- Use**
 - + Residential

Attack pests from all angles — even upside down

Temprid® Ready-to-Spray insecticide lets you deliver immediate results in an all-in-one solution by combining the proven performance of Temprid FX insecticide with bag-on-valve technology. Its dual modes of action manage pyrethroid-resistant bedbugs and eggs plus other hard-to-manage pests indoors and outdoors.

- Active Ingredient**
 - + Imidacloprid
 - + B-cyfluthrin
- Formulation**
 - + Ready-to-use
- Use**
 - + Residential

Hard-to-manage pests

Get fast knockdown with these problem solvers

Rely on quick broad-spectrum control of more than 100 nuisance pests

Tempo® Ultra WP insecticide offers fast-acting insect control. You'll see your most effective and consistent results with fast knockdown and long residual.

- Active Ingredient**
 - + B-cyfluthrin
- Formulation**
 - + Wettable powder
 - + Also available in water soluble packets
- Use**
 - + Commercial
 - + Residential

Your easiest way to broad-spectrum control

Tempo® SC Ultra insecticide delivers the power of a powder formulation in a liquid. It's less messy to handle, needs less agitation and is more evenly dispersed during application.

- Active Ingredient**
 - + B-cyfluthrin
- Formulation**
 - + Suspension concentrate
- Use**
 - + Commercial
 - + Residential

Experience effective pest control with a long residual

Tempo® 1% Dust insecticide is a ready-to-use dust for easy use in hard-to-reach sites both indoors and outdoors. It's especially effective against bedbugs and stinging insects and offers effective residual control of ants, cockroaches, wasps and other pests.

- Active Ingredient**
 - + B-cyfluthrin
- Formulation**
 - + Dust
- Use**
 - + Commercial
 - + Residential

Maxforce® roach portfolio

Precise. Proven. Powerful.

Maxforce® FC Magnum roach bait gel

Get comprehensive results with the power to eliminate roaches in the same day

Satisfy your customers quickly with Maxforce® FC Magnum roach bait gel, the most effective roach bait available. No other bait gel reduces populations this fast.

Active Ingredient	Formulation	Use
+ Fipronil	+ Bait gel	+ Commercial + Residential

Maxforce Impact® roach gel bait

Prevent resistance with rotational application and proven control

Maxforce Impact® roach gel bait gives you the flexibility and power to eliminate both normal and bait-averse strains of German cockroaches. It delivers a matrix roaches can't get enough of – and it's scientifically designed to combat aversion and prevent resistance.

Active Ingredient	Formulation	Use
+ Clothianidin	+ Bait gel	+ Commercial + Residential

Maxforce® FC Select roach bait gel

Discover fast knockdown power in a proven maintenance solution

Maxforce® FC Select roach bait gel attracts and eliminates both normal and bait-averse German cockroaches. The exclusive Domino Effect® works through ingestion and contact in hard-to-reach places.

Active Ingredient	Formulation	Use
+ Fipronil	+ Bait gel	+ Commercial + Residential

Maxforce® FC Roach Bait Stations

Ensure low-impact control of roaches for up to one year

Maxforce® FC Roach Bait Stations let you deliver effective control for up to one year (or until the bait is completely consumed). The design is low impact, child-resistant, easy to inspect, and allows you to monitor and replace stations as needed for maximum account retention.

Active Ingredient	Formulation	Use
+ Fipronil	+ Bait station	+ Commercial + Residential

Maxforce® fly solutions

Proven, powerful control of flies wherever you need coverage

Maxforce® Fly Spot Bait

See fast knockdown with the power to eliminate in 60 seconds or less

Maxforce® Fly Spot Bait provides an unobtrusive way to control houseflies both indoors and outdoors, including non-food areas of commercial food-handling establishments and animal facilities. It eliminates flies in 60 seconds or less, so you get the power of immediate results plus the confidence of a long residual.

Active Ingredient	Use
+ Imidacloprid	+ Commercial + Residential
Formulation	
+ Water soluble powder	

Maxforce® Granular Fly Bait

Lean on the power of four attractants to eliminate flies immediately and get proven control

Maxforce® Granular Fly Bait lets you eliminate flies for up to 30 days by luring them with an irresistible aroma, a seductive pheromone, color and a sugar base. Easy application options include broadcast treatment, bait stations or dissolving in water to paint on surfaces.

Active Ingredient	Use
+ Imidacloprid	+ Commercial + Residential
Formulation	
+ Granular	

Maxforce® ant solutions

Control ants all year long with proven solutions

Maxforce® Complete granular insect bait

Tackle the bookends of seasons for ants and other insects with the broadest spectrum of control

Control a wide variety of ant species, plus cockroaches, crickets, silverfish and more, with Maxforce® Complete granular insect bait. The Simply Irresistible™ food ingredients combined with the delayed-action power of the active ingredient eliminates ant colonies through the exclusive Maxforce Domino Effect®.

Active Ingredient	Use
+ Hydramethylnon	+ Commercial
	+ Residential
Formulation	
+ Granular	

Maxforce® Fleet ant bait gel

Deliver powerful action and fast control with surgical placement indoors or outdoors

Eliminate ant colonies seven days quicker than any competitor with a new, thicker formula that stands up where you need it. Get the fastest-acting formulation of the ant control you've come to depend on.

Active Ingredient	Use
+ Fipronil	+ Commercial
	+ Residential
Formulation	
+ Bait gel	

Maxforce® Quantum ant bait gel

Eliminate all species of ants with a powerful and lasting solution

Offer your customers economical ant control that lasts from one quarterly service visit to the next with Maxforce® Quantum ant bait gel. Its hygroscopic formula retains and absorbs moisture to keep it attractive to ants.

Active Ingredient	Use
+ Imidacloprid	+ Commercial
	+ Residential
Formulation	
+ Liquid gel	

Maxforce® FC Ant Bait Stations

Provide up to one year of effective ant control

Maxforce® FC Ant Bait Stations set you up for success with the patented Simply Irresistible formula that controls odorous house ants, pharaoh ants and more. This product attracts foraging worker ants that feed on the bait and take some back to the nest, destroying the queen and the entire colony.

Active Ingredient	Use
+ Fipronil	+ Commercial
	+ Residential
Formulation	
+ Bait station	

Fire ant solutions

Save the day with low doses and long-term control

Deliver up to one year of fire ant control with a single application

Topchoice® insecticide lets you control fire ants for up to a full year in public and private green spaces. A single application controls existing colonies and prevents new infestations from forming, and it's formulated specifically for the broadcast application with commercially available spreaders.

Active Ingredient	Formulation	Use
+ Fipronil	+ Granular	+ Commercial
		+ Residential

Maxforce® FC Fire Ant Bait

Establish long-lasting fire ant control with low-dose granules

Maxforce® FC Fire Ant Bait gives you control of fire ants with a Simply Irresistible™ formula and the exclusive Maxforce Domino Effect®. This product is labeled for residential and commercial properties and can be applied in a wide variety of locations.

Active Ingredient	Use
+ Fipronil	+ Commercial
	+ Residential
Formulation	
+ Granular	

Premise® termite solutions

Trust these high-performing, long-lasting termite products

Premise® 2 insecticide

Utilize the liquid formulation of the original non-repellent termiticide

You'll deliver high performance, affordability and excellent value with Premise® 2 insecticide, a non-repellent termiticide. This product cannot be detected by termites, so they tunnel through the treated soil and become exposed.

Active Ingredient	Formulation	Use
+ Imidacloprid	+ Suspension concentrate	+ Commercial + Residential

Premise® Foam termiticide

Experience the original non-repellent termiticide in a portable instant foam

Premise® Foam termiticide lets you attack termite problems on the spot with a precisely formulated dry foam that works every time and under any condition. No measuring, mixing or waiting around required – ideal for targeted applications.

Active Ingredient	Formulation	Use
+ Imidacloprid	+ Foam	+ Commercial + Residential

Premise® 75 WP insecticide

Benefit from a high-performance, non-repellent termiticide

Premise® 75 WP insecticide is a non-repellent termiticide that lets you deliver affordability and high performance. Termites cannot detect this product, so they tunnel into the treated zone and become exposed. This product can be applied at the lowest rate currently available.

Active Ingredient	Formulation	Use
+ Imidacloprid	+ Water soluble packets	+ Commercial + Residential

Premise® Pre-Construction insecticide

Count on the original non-repellent termiticide

Offer your customers excellent value with Premise® Pre-Construction insecticide, a non-repellent termiticide that delivers high performance and affordability – and won't harm plumbing. This product cannot be detected by termites, so they come directly in contact with the active ingredient.

Active Ingredient	Formulation	Use
+ Imidacloprid	+ Liquid	+ Commercial + Residential

Premise® Pro insecticide

Plan on superior pre-construction treatment for protection against subterranean termite species

Premise® Pro insecticide lets you promise superior pre-construction protection against subterranean termite species. This non-repellent product cannot be detected by termites, so they come into direct contact with the active ingredient, and it's not harmful to plumbing.

Active Ingredient	Use
+ Imidacloprid	+ Commercial + Residential
Formulation	
+ Suspension concentrate	

Premise® Granules

Apply the only non-repellent termiticide in granule formulation

Provide a low-cost additional layer of termite protection with Premise® Granules, a quick and easy solution that starts eliminating termites instantly. This product can be used as a perimeter application or spot treatment.

Active Ingredient	Use
+ Imidacloprid	+ Commercial + Residential
Formulation	
+ Granular	

General insect control

Gain more control and ensure greater customer satisfaction

Control pop-up pests for a full 30 days with a rotational solution

Barricor® SP insecticide is your best option for rotation to cover occasional invaders where you would typically use bifenthrin. You'll quickly tackle issues and build customer confidence in your overall program.

Active Ingredient	Formulation	Use
+ Deltamethrin	+ Solid particle liquid concentrate	+ Commercial + Residential

Establish quick control of dozens of standard pests

You'll get powerful control of pests with Drione® Dust insecticide. It's labeled for use in commercial and industrial areas, including within food areas as a crack-and-crevice treatment.

Active Ingredients	Formulation	Use
+ Pyrethrins + Piperonyl butoxide + Amorphous silica gel	+ Dust	+ Commercial + Residential

DeltaDust® insecticide

Deploy the only 100% waterproof dust for general pest control

Be a hero in commercial food-handling establishments with DeltaDust® insecticide, a 100% waterproof dust that will not clump or absorb moisture. It is an ideal tool for eliminating pests in wet areas and is also labeled for application directly into drains that lead to sewers that can harbor cockroaches, phorid flies and other pests.

DeltaGard® insecticide

Make a difference against mosquitoes

DeltaGard® insecticide helps you outperform the competition at lower application rates while providing the superior efficacy you need to help protect your community from mosquitoes that may carry diseases.

Active Ingredient	Formulation	Use
+ Deltamethrin	+ Oil-in-water emulsion	+ Commercial + Residential

DeltaGard® G low-dose granules

Utilize easy-to-apply granules with flexible use directions

Control perimeter pests (including ticks) and subsurface insect pests (mole crickets) in and around lawns and landscapes with DeltaGard® G low-dose granules. This product is effective at application rates that are 50 times lower compared to older granular insecticides.

Active Ingredient	Formulation	Use
+ Deltamethrin	+ Water dispersible granular	+ Commercial + Residential

General insect control

Gain more control and ensure greater customer satisfaction

Discover a core solution that optimizes the effectiveness of your pest management program

Deliver a lasting, effective solution with the polymer barrier of Suspend® PolyZone® insecticide. Applications of this product keep working and build layers over time to maximize effectiveness and deliver confidence for the rest of your rotations. Available in 1 pint, 1 gallon and a 30-gallon drum.

Active Ingredient	Formulation	Use
+ Deltamethrin	+ Suspension concentrate	+ Commercial + Residential

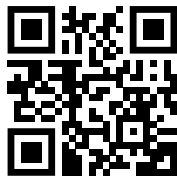

Depend on proven broad-spectrum coverage with the flexibility for a broad application

Get the job done with Suspend® SC insecticide, our proven all-in-one GIC solution. It covers the broadest spectrum of pests and ensures effectiveness that lasts, plus it's flexible in application so you can use it in more environments.

Active Ingredient	Formulation	Use
+ Deltamethrin	+ Suspension concentrate	+ Commercial + Residential

Advancing healthy environments for everyone everywhere
