

Fall *Poa Annua* Control in Warm-Season Lawns

Envu offers a premier preemergence herbicide in Specticle® FLO for *Poa annua* control in warm-season turf. Specticle® FLO has a novel site of action providing industry-leading efficacy and length of control.

Specticle® FLO

- Excellent control of *Poa annua*, goosegrass, doveweed, annual kyllinga and other sedges
- Broad-spectrum control of over 100 grassy and broadleaf weeds
- Up to 6 months of residual control
- Compatible with postemergence herbicides
- No signal word on label

For best results with Specticle FLO

- Apply when the soil is relatively dry – do not apply to saturated soils
- Activate with light irrigation (0.1-0.125") or rainfall soon after application
- Delay application when major rain events are predicted soon after application
- Do not apply to cool-season turf

Poa annua

Poa annua (annual bluegrass) is arguably the world's most problematic turfgrass weed, with herbicide resistance becoming a growing problem for turf managers. University research has shown that tank-mixing herbicides with different modes of action is more effective at limiting resistance than rotating herbicides with different modes of action.

Poa annua is a winter annual that germinates during fall when soil temperatures drop below 70°F."

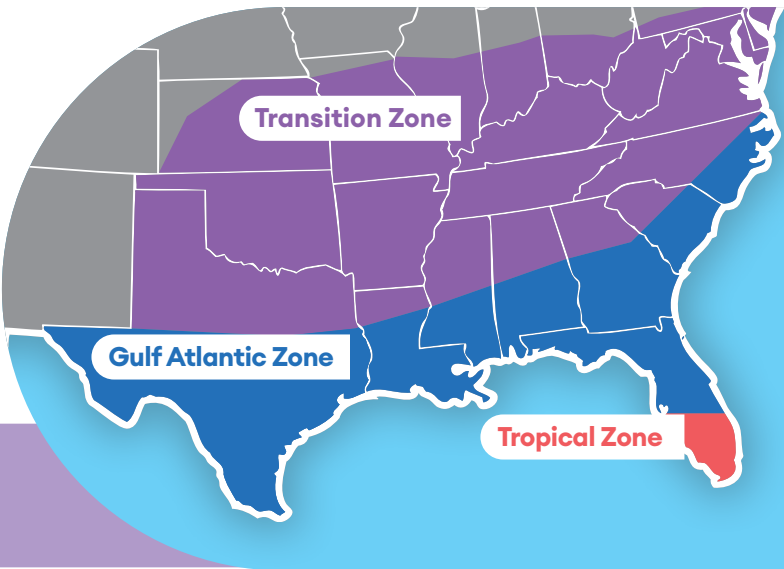

Two Management Options for Poa

1. A single or split application of Specticle® FLO

- Delivers consistent control
- Best for use on lawns where Specticle FLO has been used for less than 5 consecutive years

2. PRE3: A tank mix of 3 modes of action (Specticle FLO + Tribute® Total + Simazine)

- Delivers the most consistent control
- Preferred option for lawns where Specticle FLO has been used for 5 years or more consecutively
- Maximizes control of perennial and winter annual broadleaf weeds

For specific herbicide recommendations and application timing based on your location and turfgrass species, contact your Envu Area Sales Manager.

Fall Poa Control Programs

Turf Species	Target Weeds	September	October	November	December
Bermudagrass & Zoysiagrass	Poa & Labelled Broadleaf Weed Control through May 1st	¹ Specticle® FLO 9 fl. oz./A Good			
		¹ Specticle FLO 3 fl. oz./A <i>Followed by</i>	¹ Specticle FLO 5-6 fl. oz./A + Simazine 1 lb. ai/A Apply 45-60 days later Better		
			PRE3 ¹ Specticle FLO 6 fl. oz./ A + Tribute® Total 1 fl. oz./A + Simazine 1 lb. ai/A + NIS 0.25% v/v Best		
Centipede and St. Augustine		¹ Specticle FLO 3 fl. oz./A <i>Followed by</i>	Specticle FLO 3 fl. oz./A Apply 45-60 days later		

¹Assess turf quality before each application and do not apply if turf is stressed or injured. Always read and follow label instructions.
