

AQUAPY[®]

EW165

Precision in Every Particle

Faster, Cleaner Control

AquaPy delivers rapid knockdown performance across diverse treatment scenarios, backed by the proven science of FFAST™ technology. Its water-based, low-odour, non-flammable formulation ensures compatibility with sensitive sites and hygiene-critical environments.

The Science Advantage

- FFAST™ anti-evaporant droplet technology for superior airborne performance.
- Water-based, low-odour, non-flammable formulation ideal for sensitive environments.

Operational Flexibility

- One product for ULV, misting, thermal fogging, and surface spraying.
- Effective flush-out, rapid knockdown and kill of flying and crawling pests.

Volume Efficiency

- Clear, technician-friendly ULV rates for predictable job costing.

Compliance-Ready

- Suitable for food handling sites, public buildings, and empty grain stores.
- Backed by Envu stewardship, SDS guidance and technical support.

Why Professionals Choose AquaPy

- Engineered droplet science that outperforms commodity pyrethrins.
- Versatility and reliability trusted across high-compliance sectors.

Product Overview

Active Ingredients:

3% *Chrysanthemum cinerariaefolium*, extracted from open and mature flowers of *Tannacetum cinerariaefolium*.

For the control of:

Flying and crawling insects such as - Stored product moths, Tobacco beetles, Cockroaches and grain weevils.

Areas of use:

Aircraft, commodity storage, public buildings, farm buildings and outdoors.

Application Rates:

100 - 400 ml treats 3000m²
