WARNINGS:**Hazard statements**

To avoid risks to human health and the environment, comply with the instructions for use.

Handle with care.

Keep out of reach of children, uninformed persons, and animals. Store bait in its pack away from food and feedstuffs.

Poisonous if swallowed and upon prolonged contact with the skin.

Toxic to fish and wildlife.

Do not place the bait at random in treated area but use exclusively as given under directions for use.

In case of poisoning call a physician and show him/her this label.

Prior to treatment, inform any possible bystanders about the rodent control campaign.

DISCLAIMER:

ALTHOUGH THIS PRODUCT HAS BEEN EXTENSIVELY TESTED UNDER A LARGE VARIETY OF CONDITIONS, FAILURE THEREOF MAY ENSUE AS A RESULT OF A WIDE RANGE OF REASONS. IF THIS IS SUSPECTED, KINDLY NOTIFY THE REGISTRATION HOLDER.

PRECAUTIONS:**Precautionary statements**

Do not eat, drink, or smoke when using this product.

Get medical advice/ attention if you feel unwell.

Dispose of contents/container in accordance with local regulation.

Avoid contamination of any edible commodity, food utensils and drinking water.

Set bait where it will be inaccessible to children and domestic animals.

Avoid contact with skin. Wear rubber gloves during application and wash hands after handling.

Do not eat, drink, or smoke whilst handling the bait.

Destroy empty container and do not use for any other purpose.

Bury or burn dead rodents and any bait not consumed at end of treatment.

RELEVANT SUBSTANCES

Name	CAS-No. / EC-No. / REACH Reg. No.	Conc. [%]
difethialone	104653-34-1	0,0025

SYMPTOMS OF POISONING:

Bleeding from the gums and nose, bleeding under the skin, pallor, haemorrhage into and around elbow and knee joints. Blood in urine and faeces.

FIRST AID TREATMENT

Remove patient from source of poisoning and keep him/her quiet and reassured. Take patient IMMEDIATELY to the nearest physician. Never give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN

Administer 5 mg/kg Vit. K₁ intravenously on the first day, followed by another administration of the same dose if the Quick time does not normalise a few hours after the first injection. Follow up with 5 mg/kg/day orally on the second and following days. The duration of the treatment is generally between 10 and 15 days.

In severe cases give small transfusions of fresh blood.

DIRECTIONS FOR USE: USE ONLY AS DIRECTED.

Finale® Rat and Wax Blocks can kill rats and mice after a single feed

Death of rodents will occur in 4- 12 days. [Wear gloves when collecting dead rodents.](#)

Effective against warfarin resistant rats and mice.

For use on the farm and industrial premises (outside buildings, warehouses and stores).

Before laying bait inspect infested area thoroughly to determine rat or mouse entry, nesting and feeding sites and water sources. [Prevent contamination of waterways.](#)

If bait boxes are deployed, the following product information (i.e., label and/or leaflet) should be properly labelled:

- "do not move or open".
- "contains a rodenticide".
- product name or Act 36 of 1947 registration number.
- active substance(s) and
- "in case of incident, call a poison centre (poison centre number must be provided on the bait box).

Norway- and Roof Rats

Place **Finale® Rat and Wax Blocks** in a covered bait station to prevent access to children and domestic animals.

1. Initial baiting of heavy infestations:

Place 3-4 **Finale® Rat and Wax Blocks** per bait station every 5- 10m (or 50m²) along walls or ratruns, in rat burrows and in sheltered areas where rats are known to live or feed.

Bait points should be inspected and replenished every 7 days until feeding ceases.

2. Permanent baiting

Place 1 block per bait station every 5 - 10 m (or 50 m²) to maintain control.

Place 1 **Finale® Rat and Wax Block** per bait station every 2-4m (or 10m²) along walls or runways, in nests and in sheltered areas where mice are known to live or feed.

The single feeding action of **Finale® Rat and Wax Blocks** is particularly effective against mice with their small appetites and sporadic feeding behaviour. If necessary, replenish every 7 - 14 days until feeding ceases.

To prevent re-infestation, maintain a few permanent baiting points.
